

exception

```
graph BT; SyntaxError --> exception
```

A diagram illustrating the inheritance of the `exception` base class by the `SyntaxError` class. The word `exception` is displayed in a large, black, serif font within a rectangular box at the top. Below it, the word `SyntaxError` is displayed in the same font within another rectangular box. A vertical black arrow points from the top of the `SyntaxError` box to the bottom of the `exception` box, indicating that `SyntaxError` inherits from `exception`.

SyntaxError
